- Foreign-currency bills are converted to INR at the documented exchange rate on the treatment date.
- INR benefit limits and the Rs 5,000 deductible are applied after conversion.
- Accredited international hospitals are accepted for treatment and billing.

Example (Scenario 5): THB 49,950 × 2.12 = Rs 1,05,879 — within the Rs 5,00,000 combined limit; payable less the Rs 5,000 deductible.

5. Coverage decision logic

Condition evaluated	Coverage decision
Active policy, incident within trip dates, covered emergency, amount within limit after conversion	COVERED — less Rs 5,000 deductible
Bill in foreign currency	CONVERT to INR, then apply limits
Converted amount exceeds combined limit	COVERED (CAPPED) at Rs 5,00,000
Cause maps to an exclusion (pre-existing, high-risk sport, intoxication)	NOT COVERED
Incident outside declared travel window / policy inactive	NOT COVERED
